

Transportation Research Board Committee ADC60 - Waste Management in
Transportation

CALL FOR PAPERS

2006 Summer Conference
Chicago, Illinois
July 9 – 11, 2006

Hosted by
The Illinois Department of Transportation

The conference will focus on transportation-related, systems-based solutions and research involving:

- Pollution Prevention and Waste Reduction
- Contaminated Materials Management and Tracking
- Product Substitution and Green Designs
- Materials Recycling and Reuse
- Establishment of BMPs
- Environmental Management Systems
- Brownfields Programs in Urban Transportation Systems

Our goal is to promote the transportation industry's evolution from a solid and hazardous waste remediation and management approach to a waste minimization and reuse approach. This evolution can be achieved through the development and integration of proactive environmental systems, procedures, and tools into transportation activities and programs.

Suggested Topic Areas

- Lessons Learned with EMS – measuring success, gaining support, what did / did not work and why, measuring and reporting EMS performance and sector-based approaches
- Practicing Waste Management Stewardship – development and incorporation of Best Management Practices
- Agency Buy-In of Environmental Management Approaches -
- Innovative Reuse of Materials
- Methods for Tracking Waste Throughout Project Duration
- Innovative Technologies for Contaminated Site Cleanups
- Applications of Green Design in Transportation Facilities
